

Clinton Township School District

Restart and Recovery Plan

The Road Forward

2021 - 2022 School Year

Johanna S. Ruberto, *Interim Superintendent*

Mark Kramer, *Interim Business Administrator*

Administrative Team

Mrs. Joanne Hinkle, Director of Special Projects

Ms. Alexa Ingram, Director of Special Services

Mr. Luke Mason, Clinton Township Middle School Acting Principal

Mrs. Mary Postma, Round Valley School Principal

Mrs. Melissa Goad, Patrick McGaheran School Principal

Mrs. Jennifer Paccione, Supervisor of Instruction, Data & Assessment

Approved by the Clinton Township Board of Education September 27, 2021

Amended and approved October 25, 2021

Amended and approved March 14, 2022 - Added as an appendix to

Policy 1648.11 *The Road Forward COVID 19 - Health and Safety*

Executive Order 251 - sunset March 7, 2022 - Masks Optional

CDC masks optional on buses - March 7, 2022

*This original plan includes revisions as indicated for Fall 2021 as per “Safe Return.” The “Safe Return” plan includes adherence to all CDC, NJDOE & NJDOH.

Posted on Clinton Township School District website - September 24, 2021

Introduction

In June of 2021, the New Jersey Department of Education (NJDOE) published “The Road Forward” (NJDOE Guidance) as a collaborative effort to coordinate the return to full time, in person education. This guidance includes a range of strategies that Local Education Agencies (LEAs) should consider implementing to reduce the risks to students and staff from COVID-19 while still allowing for full time, in-person learning. The guidance presents information in the following areas: General Health and Safety, Cleaning Disinfection and Air Flow, Screening, Exclusion and Response, Screening, Exclusion, and Response to Symptomatic Students and Staff, Contact Tracing and Testing. Our district will adhere to the parameters outlined in Executive Order 251 and Executive Order 253.

Clinton Township School District opened the 2021 - 2022 school year with an in person model of instruction. Identifying the reopening plan has been the first priority as is the health and safety of our students. The District will maintain emerging information as it relates to data to guide us with immediate decisions.

The plan addresses the needs of all our students as individuals and identifies the needs of our faculty and staff. Each school will share their specific schedule with the parents and guardians of the students and provide professional learning and training for the faculty and staff to prepare for the opening of school. All students in the school district have been issued a device for instructional use. A review of device needs and access to the Internet have been reviewed during the 2020 - 2021 school year and all families have access and devices.

The hours of operation for each school are posted on the district website and reflect our normal operating hours. Our district is committed to a resumption of normalcy for the school year. Our district will monitor the data. Our decisions will be guided through the collaborative process based on CDC guidance, NJDOH, collaboration with the local DOH, and our local district physician.

Representatives from the Clinton Township School District have attended webinars to gain legal counsel to maintain the rights and privacy of our students and members of the faculty and staff. In consultation with the District’s legal counsel, the District has provided forms and procedures to support both faculty and staff as it relates to individualized medical and personal considerations during this period of time. All questions and answers have been distributed to the faculty and staff to maintain information as it relates to their concerns and questions.

Philosophy

The Clinton Township School District is prepared and ready to address any emergent situation during the COVID 19 crisis. Our mission is to ensure meaningful and challenging educational experiences in a supportive environment. The current pandemic has posed a great challenge to our larger community and requires us to find the balance between our mission and our obligation to our educational community as a whole. Our children need to learn, to engage, and to interact. We all need to be safe. Health and safety is the priority we share.

Our goal is to support all of our children as well as all members of our educational community. In framing a reopening plan, we will consider the unique needs of our community, best practices for educating our children, CDC guidelines, requirements from the NJ Department of Education, the Governor's Office and the Department of Health. While we have been provided with guidance, our goal is to go beyond the minimal standards required and create a plan that provides all of our stakeholder groups with a safe and impactful learning format.

We acknowledge that while our decisions will impact everyone, they will not always meet the expectations of everyone. While the schools in our state strive to do everything we can for you, our partners, we need our parents to recognize that they are the first line of responsibility in this process. It is essential that anyone that becomes ill, remains at home - for the health and wellness of everyone and ultimately for the continuity of the education of our students.

Framework for Success

Foundation: Health and Safety

1. Health and Safety for ALL who work and learn in our schools
2. What is best for the students' and staff and educational and socially/emotionally needs to be successful
3. Consistency for families, students, and staff

NJDOE Conditions for Learning

Conditions for learning must not only address students' and educators' basic physical safety needs, but also the social and emotional and environmental factors that can impact educators' capacity to teach and students' capacity to learn. These conditions include Health & Safety, Social Emotional Learning and School Climate and Culture, Multi-Tiered System of Supports (MTSS), Wraparound Supports, Food Service and Distribution and Quality Child Care. The Clinton Township School District has formed district and building based response teams as an integral part of a collaborative decision making model. Our District continues to work collaboratively with the Office of Emergency Management (OEM), Hunterdon Medical Center, Hunterdon County Department of Health (HCDOH), and our District physician.

EO 251 - [Here](#)

EO 253 - [Here](#)

#1 General Health and Safety Guideline

Our District complies with the Center for Disease Control (CDC), state, and local guidelines to provide reasonable accommodations for staff and students at higher risk for severe illness and promote behaviors that reduce spread, such as social distancing, frequent hand washing, and the use of face coverings.

Where possible, the following recommendations should be used to develop a layered approach to help prevent the spread of COVID-19. Schools should implement as many layers as feasible.

1.1 Vaccination

Our district is a PreK-8 district with a mixed population of fully vaccinated, partially vaccinated, and unvaccinated individuals. This requires the layering of preventive measures to protect individuals who are not fully vaccinated. In the future, as vaccine eligibility expands and becomes available to the student population under the age of 12, the district will facilitate vaccine clinics in collaboration with the district physician and local DOH.

- Our district has implemented structures and processes in support of compliance with [Executive Order 253](#). please refer to the Appendices on page 14.

1.2 Communication

Our district officials and local health department maintain close communication with each other to provide information and share resources on COVID-19 transmission, prevention, and control measures and to establish procedures for Local Health Department (LHD) notification and response to COVID-19 illness in school settings. A District Advisory Committee was established in July 2020 involving stakeholders from all areas of our educational community. The District Reopening Plan was published on the district website and updated throughout the year. The District Advisory Committee meets regularly to review data and outline plans to maintain the health and safety of our school community.

Understanding that COVID-19 may impact certain areas of the state differently, NJDOH provides information on COVID-19 transmission at the regional level, characterizing community transmission as low (green), moderate (yellow), high (orange), and very high (red). This information is posted online every week on the NJDOH CDS COVID-19 website and sent out via New Jersey Local Information Network and Communications System (NJLINCS) to public health and healthcare partners. Municipal level vaccination coverage data is posted online at www.nj.gov/health/cd/topics/covid2019_dashboard.shtml.

Communication will be made available in any language by requesting this through the main office of their school.

District Protocols are outlined and updated in the [CTSD Opening Protocols 2021](#).

Internal structures are in place to communicate with faculty and staff through email and internal website postings. A chain of command is in place between the administration, faculty and staff, and external collaborative partners to maintain information, outline protocols, and provide updated information on relevant data.

1.3 Masks

Wearing masks is an important prevention strategy to help slow the spread of COVID-19, especially when combined with everyday preventive actions and social distancing in public settings.

Executive Order 251 was released on August 6th, 2021 and requires that all staff, students, and visitors wear a mask regardless of vaccination status in the indoor premises of our school buildings.

Where an individual is seeking a medical exemption from the masking requirement, documentation from a medical professional supporting this exception is required pursuant to Executive Order No. 253. (updated 9/1/2021). Our district has communicated information and procedures for when a mask exemption is being requested. Medical documentation is required and will be reviewed by district personnel and the district physician. Parents have been notified that this requires a five day turn around.

See posted information:

- [At A Glance Health & Safety](#)
- [CTSD Opening Protocols 2021](#)
- Transportation: Per [Order of the CDC](#), passengers and drivers must wear masks on school buses, including on buses operated by public and private school systems, subject to the exclusions and exemptions in the Order.

1.4 Maintain Physical Distancing and Cohorting

The Clinton Township School district offered full-day, full-time, in person learning to all students for the 2021-2022 school year. Our district is implementing physical distancing measures of 3 feet between students and 6 feet between staff and students as an effective COVID-19 prevention strategy to the extent they are equipped to do so while still providing regular school operations to all students and staff in-person. Our district will monitor data and local COVID levels during periods of high community transmission to determine if maximum physical distancing is warranted.

Following local data and district data, the district will respond appropriately to the physical distancing requirements to maximize preventative measures. Guidance on room layouts and seating has been provided to teaching staff to maximize 3 feet of physical distancing based on the current data.

1.5 Hand Hygiene and Respiratory Etiquette

Hand washing and hand sanitizing

- Hand sanitizing stations with alcohol-based hand sanitizers (at least 60% alcohol) will be set up:
 - At entrances and exits of buildings
 - In each classroom (for staff and older children who can safely use hand sanitizer)
 - Outside lunch rooms and bathrooms
- Children ages 5 and younger will be supervised when using hand sanitizer
- Classrooms with sink areas will have stocked stations with soap, water, and alcohol-based hand sanitizers
- Students and staff should wash hands for at least 20 seconds at regular intervals, including before eating, after using the bathroom, and after blowing their nose/coughing/sneezing. Visual reminders will be posted around all sink areas.
- Students and staff will adopt new procedures to sanitize in and out of every room and when moving from one place to another or beginning a new task/activity

Respiratory Etiquette

All students and staff are required to wear a mask in accordance with Executive Order 253. Our district encourages students and staff to cover coughs and sneezes with a tissue if not wearing a mask.

- Used tissues should be thrown in the trash and hand hygiene as outlined above should be performed immediately.
- Breaks from wearing masks are permitted when students and staff are outside and when maintaining physical distance at six feet.

1.6 Meals

Our district is offering meals in the cafeteria and other classroom areas. Layered prevention strategies to help mitigate the spread of COVID-19 are being implemented and include:

- Maintaining physical distancing between students and staff, if possible.
- Alternative settings for group dining areas such as eating in classrooms.
- CTMS has added options for outdoor lunches, weather permitting.
- Staggered eating times to allow for greater physical distancing.
- Maintaining student cohorts and limiting mixing between groups, where possible, with assigned seating.
- Pre-packaged meals only, no self serve options are available.
- Sharing meals is not permitted.
- Routine cleaning between groups.
- School schedules have been modified to allow for movement between classes.

1.7 Transportation

The district contracts transportation services with local vendors and collaboratively plans for preventative measures and strategies for all vehicles. School buses should be considered school property for the purpose of determining the need for prevention strategies.

- Masks must be worn by all passengers on buses, regardless of vaccination status per [CDC's Federal Order](#).
- If occupancy allows, maximize physical distance between students.
- Seating charts for all school buses are completed to facilitate contact tracing.
- Open windows to increase airflow in buses and other transportation, if possible. Regularly clean high touch surfaces on school buses at least daily.
- Additional masks have been ordered for our transportation vendors.
- No field trips are being considered at this time.
- For more information about cleaning and disinfecting school buses or other transport vehicles, read CDC's guidance for bus transit operators.

#2 Cleaning, Disinfection and Airflow

2.1 Limit Use of Shared Supplies and Equipment

- Ensure adequate supplies (i.e. classroom supplies, equipment) to minimize sharing of high-touch materials or limit use of supplies and equipment by one group of students at a time and clean and disinfect routinely and preferably between use.
- Encourage hand hygiene practices between use of shared items.
- Discourage use of shared items that cannot be cleaned and disinfected.
- Limit use of shared supplies and equipment
- The district has additional portable sinks for staff and student use
- Drinking fountains are turned off and bottle fillers are on. Students and staff are encouraged to bring their own reusable water bottles.

2.2 Cleaning and Disinfection

The CTSD will follow standard procedures for routine cleaning and disinfecting with an EPA-registered product for use against SARSCoV-2. This means daily cleaning and disinfecting surfaces and objects that are touched often, such as desks, countertops, doorknobs, computer keyboards, hands-on learning items, faucet handles, phones, and toys.

- Areas will be closed to allow for cleaning, in the event of exposure.
- Any person that exhibits COVID-19 compatible symptoms or tests positive for COVID-19 within 24 hours of being in the school building requires that school staff clean and disinfect the spaces occupied by the person.
- Masks and gloves will be used while disinfecting all areas.
- Once the area has been appropriately disinfected, the area will be reopened.

2.3 Improving Airflow

Improve airflow to the extent possible to increase circulation of outdoor air, increase the delivery of clean air, and dilute potential contaminants. This can be achieved through several strategies that include:

- A comprehensive review of our HVAC systems was completed in 2020.
- Additional equipment for air purification has been purchased.
- Music rooms have been equipped with air purifiers.
- Opening windows to refresh with outside air, when appropriate.
- Staff has been directed to hold activities outdoors if weather permits.
- Larger open space areas within the schools are being utilized for larger group sessions.
- Child-safe fans are utilized in strategic locations.

#3 Screening, Exclusion, and Response to Symptomatic Students and Staff

3.1 Parental Screening

Parents/caregivers were strongly encouraged to monitor their children for signs of illness every day as they are the front line for assessing illness in their children. Students who are sick should not attend school. Exclusion criteria for both students and staff has been distributed on a regular basis. The district monitors local and in-district data continually. Analysis of the data will determine the addition of a daily health screening tool. The Health Assurances Statement is located on the parent portal in PowerSchool; please log into the Parent Portal in PowerSchool to verify your agreement. Staff members follow the same protocols. An assessment will be completed at different intervals (First, October 9) to determine a return to a daily screener process.

3.2 Response to Symptomatic Students and Staff

Our district has adopted the following measures in response to symptomatic students and staff:

- Following district procedures, all absences related to Covid-like symptoms must be reported to the school nurses, per [Attendance Policy 5200](#).
- An area has been identified to isolate anyone that has been identified as having Covid-like symptoms.
- A separate area has been designated for typical visits to the school nurse.
- Hygiene supplies are available, including additional cloth masks, facial tissues, and alcohol-based hand sanitizer.
- School nurses should use Standard and Transmission-Based Precautions based on the care and tasks required.
- Staff assigned to supervise students waiting to be picked up do not need to be healthcare personnel but should follow physical distancing guidelines.
- Parents have been notified to update all contact information, which will help to ensure student pick up is required within 30 minutes of notification.

3.3 Exclusion

3.3.1 Definition of COVID-19 Compatible Symptoms

Parents should not send students to school when sick. The following symptoms as per the NJDOH, have been shared with parents and staff.

- At least two of the following symptoms: fever (measure or subjective), chills, rigors (shivers), myalgia (muscle aches), headache, sore throat, nausea or vomiting, diarrhea, fatigue, congestion, or runny nose; OR
- At least one of the following symptoms: cough, shortness of breath, difficulty breathing, new olfactory disorder, or new taste disorder.
- For students with chronic illness, only new symptoms or symptoms worse than baseline should be used to fulfill symptom-based exclusion criteria.
- The district has emphasized the need to monitor students with documented chronic illness or allergies.

3.3.2 When Illness Occurs in the School Setting

Children and staff with COVID-19 symptoms should be isolated from others and referred to their healthcare providers, until they can be sent home. Ask ill students (or parent/guardian) and staff whether they have had potential exposure to COVID-19 in the past 14 days meeting the definition of a close contact.

- Individuals will be sent home and referred to a healthcare provider. Persons with COVID-19-compatible symptoms should undergo COVID-19 testing.
- If community transmission is low, the district will follow the [NJDOH School Exclusion List](#) to determine when they may return to school. No public health notification is needed UNLESS there is an unusual increase in the number of persons who are ill (over normal levels), which might indicate an outbreak.
- If ill students have potential COVID-19 exposure OR if community transmission is moderate or high, they will be excluded according to the COVID-19 Exclusion Criteria.
- The Clinton Township School district does not have on site testing at this time.
- Ill individuals who test positive should be reported to the Local Health Department and contact tracing will begin.
- Ill individuals that test negative should be referred to a healthcare provider, who may consider additional COVID-19 testing.

The CTSD will follow all processes as directed by the NJDOH and NJDOE. All mandated training was completed in 2020.

- Regardless of vaccination status, if a student or staff member experiences COVID-compatible symptoms, they should isolate themselves from others, be clinically evaluated for COVID-19, and asked whether they have had potential exposure to COVID-19 in the past 14 days meeting the definition of a close contact.
- CTSD reports weekly student and staff case counts to NJDOH through the Surveillance for Influenza and COVID-19 (SIC) Module in CDRSS. Responsible staff were trained to report and have access to the system.

3.3.3 *Exclusion*

COVID-19 exclusion criteria for persons who have COVID-19 compatible symptoms or who test positive for COVID-19:

- Ill individuals with COVID-19 compatible symptoms who have not been tested or individuals who tested positive for COVID-19 should stay home until at least 10 days have passed since symptom onset and at least 24 hours have passed after resolution of fever without fever reducing medications and improvement in symptoms.
- Persons who test positive for COVID-19 but who are asymptomatic should stay home for 10 days from the positive test result.
- An alternate diagnosis (including a positive strep test or influenza swab) without a negative COVID-19 test is not acceptable for individuals who meet COVID-19 exclusion criteria to return to school earlier than the timeframes above.

Exception: During periods of low community transmission, ill individuals excluded for COVID-19 compatible symptoms who are not tested and do not have a known COVID-19 exposure may follow NJDOH School Exclusion List to determine when they may return to school. (updated August 2021)

The COVID-19 Exclusion List described in NJDOH guidance for Local health departments can be used to determine the need for and duration of school exclusion based on the level of COVID-19 community transmission in their region. In order to facilitate rapid diagnosis and limit unnecessary school exclusion, schools may consider implementing school-based diagnostic testing for students and staff.

COVID-19 Exclusion Criteria for Close Contacts CDC released guidance with options to shorten the quarantine time period following exposure to a confirmed positive case. While CDC and NJDOH continue to endorse 14 days as the preferred quarantine period– and thus the preferred school exclusion period – regardless of the community transmission level, it is recognized that any quarantine shorter than 14 days balances reduced burden against a small possibility of spreading the virus.

Additional information is described in NJDOH quarantine guidance. To that end, excluded individuals who are close contacts of staff or students who tested positive for COVID-19 may be considered for a

reduced exclusion period based on community transmission levels as follows:

High (orange) exposed close contacts should be excluded from school for 14 days.

Moderate or Low (yellow or green) exposed close contacts should be excluded from school for 10 days (or 7 days with negative test results collected at 5-7 days)

Schools serving medically complex or other high-risk individuals should use a 14-day exclusion period for the exclusion of these individuals or those who work closely with them when identified as close contacts in all levels of community transmission.

Exposed close contacts who are fully vaccinated and have no COVID-like symptoms:

- Do not need to quarantine, be excluded from school, or be tested following an exposure to someone with suspected or confirmed COVID-19.
- Should still monitor for symptoms of COVID-19 for 14 days following an exposure.
- If they experience symptoms, they should isolate themselves from others, be clinically evaluated for COVID-19, including SARS-CoV-2 testing and inform their health care provider of their vaccination status at the time of presentation to care.
- Each situation is handled on an individual basis.

#4 Contact Tracing

Contact tracing is the process used to identify those who come into contact with people who have tested positive for many contagious diseases – such as measles, HIV, and COVID-19 – and is a long-standing practice in New Jersey and around the world. Staff were trained as contact tracers beginning in July 2020 and continually monitor information on changes to criteria and local health department guidelines.

Here's how it works:

- When a student or staff member tests positive for COVID-19, the contact tracing procedure begins at the school level.
- Trained contact tracers from the school district obtain information about the positive individual and all of their contacts over a 48 period prior to the individual's test date or other date determined by the local health department. This includes bus transportation, lunch groups, recess contact, classroom, and any other school based activity. Contact tracing by the school district does not include outside activities or any other external activities beyond the school environment.
- A close contact is defined as an individual that is in contact for 15 minutes or more over a 24-hour period and were within 6 feet of the infectious individual.
 - A student wearing a well fitting mask and that is between 3-6 feet will not be quarantined as defined by the NJ Department of Health for the 21-22 school year. **See reference below.**

- Exception: In the K–12 indoor classroom setting or a structured outdoor setting where mask use can be observed (i.e., holding class outdoors with educator supervision), the close contact definition excludes students who were between 3 to 6 feet of an infected student (laboratory-confirmed or a [clinical diagnosis](#)) if both the infected student and the exposed student(s) [correctly and consistently](#) wore well-fitting [masks](#) the entire time. This exception does not apply to teachers, staff, or other adults in the indoor classroom setting.
- NOTE: Information is confidential and is not shared with close contacts unless permission is granted.
- Contacts are provided with education, information, and support to understand their risk, what they should do to separate themselves from others who are not exposed, how they should monitor themselves for illness, and the possibility that they could spread the infection to others even if they themselves do not feel ill.
- Individuals that are vaccinated are generally not subject to quarantines when identified as a close contact, however individual circumstances may warrant COVID-19 testing or monitoring.
- Notification to close contacts is done by a trained contact tracer only.
- The school district notifies the school community of school related situations only after contact tracing is completed or when notification is warranted based on each individual situation.
- The CALI Score and local data is used to determine quarantine timelines.

#5 Testing

The Clinton Township School district will implement [EO 253](#), and follow guidelines for the testing of unvaccinated employees. Additionally, we offer the following information:

This guidance from the New Jersey Department of Health, which can be accessed using the below links, also contains links to additional information and resources for schools and parents from the CDC:

- [NJDOH Public Health Recommendations for K-12 Schools 2021-2022 School year](#)
- [COVID-19 Public Health Recommendations for Local Health Departments for K-12 Schools](#)

5.1 Diagnostic Testing - This is not applicable to the Clinton Township School District at this time.

5.2 Screening Testing - This is not applicable to the Clinton Township School District at this time.

Appendices

A. Vaccinations

- a. Staff Google Form survey delivered 9-2021 to determine vaccination status of staff
- b. Notification and sharing of the availability of vaccinations in the local community
- c. Initial collection of vaccination status for students in the eligible category is implemented in Fall 2021. Vaccination cards entered into the student health file. At this time, submission of this information for students is voluntary.
- d. CTSD student population is in grades Kindergarten through Eighth and vaccinations for children under 12 are not available at this time.
- e. When the vaccine becomes available for students 11 and under, collaborative efforts to facilitate vaccination clinics will be coordinated with the district physician and local Department of Health.
- f. District Policy 1648.13 *School Employee Vaccination Requirements* will be approved by the Clinton Township School District Board of Education on October 25, 2021. Vaccination and/or weekly testing is a requirement of employment, and failure to maintain compliance with the established requirements as evidenced by EO253 will be addressed accordingly.
 - i. Implementation: October 18, 2021;
 - ii. Mirimus is the provider;
 - iii. No cost to the employee;
 - iv. Testing is to be completed on Wednesday of each week;
 - v. Notification from the provider by Friday of each week
 - vi. Independent testing (PCR) by the employee is permitted;
 - vii. Progressive discipline procedures have been implemented for noncompliance.

B. Communication

- a. Ongoing, consistent communication with the local Department of Health in Hunterdon County and local contact tracers consistent with CDC guidelines.
 - i. Inform local DOH of school based data related to COVID-19 to make applicable decisions when warranted.
 - ii. Work to provide consistent information on quarantines, contact tracing, and other COVID-19 related situations.
- b. Ongoing, consistent communication with the County Superintendent
- c. Ongoing, consistent communication with the Office of Emergency Management
- d. Ongoing, consistent communication with the district physician
- e. Ongoing, consistent communication with the parents, faculty/staff via emails, District Advisory Committee, and Board of Education meetings
- f. Notification is provided via alert to the district community about contact tracing situations, health mitigation strategies, and local updates.

C. Mask Wearing Protocols

- a. Implement [Executive Order 251](#)
- b. Masks must be worn at all times.
- c. Masks breaks during eating or drinking will be permitted and scheduled.
- d. Masks with valves are not permitted to be used.
- e. Cloth or paper masks that fit over the nose and around the cheeks and mouth are allowed.

D. Physical Distancing and Cohorting Protocols

- a. Instructional areas will be set up and function while maintaining social distancing to maximum extent possible by:
 - i. Classroom seating and desks 3 feet apart
 - ii. Staff maintain 6 feet of physical distance from students in the instructional setting when possible
 - iii. Forward-facing rows
 - iv. Cafeteria space is being utilized following physical distancing protocols
 - v. Students may use hallways to move from class to class following physical distancing protocols.
 - vi. Use of lockers is permitted in hallways following physical distancing protocols and a reduced period of time at the lockers by students.

E. Hand Hygiene and Respiratory Protocols

- a. Instruct and model correct handwashing protocols.
- b. Hand sanitizer is available in the classroom and common areas of each school building.
- c. Hand sanitizer is used before and after use of equipment, classroom materials, and when beginning and ending recess.
- d. The appropriate use of hand sanitizer is modeled.
- e. Encourage students and staff to cover coughs and sneezes with a tissue if not wearing a mask
- f. Procurement of adequate supplies.
- g. Assist/observe young children to ensure proper handwashing.

F. Provision of Meals

- a. Lunch is served in the cafeteria or the classroom, or if weather permits, outside. The following protocols have been implemented
 - i. Free meals by the US Department of Agriculture
 - ii. Three (3) feet social distance minimum
 - iii. The schedule is modified to allow for the movement of the students by cohort
 - iv. Assigned seating
 - v. No self-serve, meals are delivered to each student
 - vi. Routine cleaning between groups

G. Transportation Protocols

- a. Masks must be worn by all passengers on buses, regardless of vaccination status per [CDC's Federal Order](#).
- b. Maintain social distance while on the bus if possible.
- c. If possible, seat students one to a seat.
- d. Board from back to front. Disembark front to back.
- e. Sit families together.
- f. Bus windows should be open if reasonable and not a safety risk, to allow for greater air circulation.
- g. Seating charts are completed to facilitate contact tracing.
- h. <https://www.cdc.gov/quarantine/masks/mask-travel-guidance.html>

H. Cleaning, Disinfection and Airflow

- a. Training of custodial staff in specialized disinfectant procedures
- b. Schedule for cleaning/sanitizing
- c. Protocols for sanitizing after exposure is identified
- d. Water fountains - closed and replaced with bottle filling stations
- e. Hand blowers in bathrooms, are shut off
- f. Hand washing signage placed in relevant locations
- g. Review of cleaning protocols with transportation providers
- h. Food Service vendors follow all protocols for sanitizing and food handling
- i. Custodial Sanitizing handbook review
- j. Additional air purifiers secured for specific locations
- k. Encourage the opening of windows
- l. Procurement of additional air filters for music rooms and identified locations

I. Screening, Exclusion and Response to Symptomatic Students

a. Parental Screening

Parents/caregivers were strongly encouraged to monitor their children for signs of illness every day as they are the front line for assessing illness in their children. Students who are sick should not attend school. Exclusion criteria for both students and staff has been distributed on a regular basis. The district monitors local and in-district data continually. Analysis of the data will determine the addition of a daily health screening tool. The Health Assurances Statement is located on the parent portal in PowerSchool; please log into the Parent Portal in PowerSchool to verify your agreement. Staff members follow the same protocols. An assessment will be completed at different intervals (First, October 9) to determine a return to a daily screener process.

b. Response to Symptomatic Students and Staff

Our district has adopted the following measures in response to symptomatic students and staff:

- Following district procedures, all absences related to Covid-like symptoms must be reported to the school nurses, per Policy 5200.
- An area has been identified to isolate anyone that has been identified as having Covid-like symptoms.
- A separate area has been designated for typical visits to the school nurse.
- Hygiene supplies are available, including additional cloth masks, facial tissues, and alcohol-based hand sanitizer.
- School nurses should use Standard and Transmission-Based Precautions based on the care and tasks required.
- Staff assigned to supervise students waiting to be picked up do not need to be healthcare personnel but should follow physical distancing guidelines.
- Parents have been notified to update all contact information, which will help to ensure student pick up is required within 30 minutes of notification.

c. Exclusion

Parents should not send students to school when sick. Staff members should not come to work when sick. The following symptoms as per the NJDOH, have been shared with parents and staff.

- At least two of the following symptoms: fever (measure or subjective), chills, rigors (shivers), myalgia (muscle aches), headache, sore throat, nausea or vomiting, diarrhea, fatigue, congestion, or runny nose; OR
- At least one of the following symptoms: cough, shortness of breath, difficulty breathing, new olfactory disorder, or new taste disorder.
- For students with chronic illness, only new symptoms or symptoms worse than baseline should be used to fulfill symptom-based exclusion criteria.
- The district has emphasized the need to monitor students with documented chronic illness or allergies.

d. When Illness Occurs in the School Setting

Children and staff with COVID-19 symptoms should be isolated from others and referred to their healthcare providers, until they can be sent home. Ask ill students (or parent/guardian) and staff whether they have had potential exposure to COVID-19 in the past 14 days meeting the definition of a close contact.

- Individuals will be sent home and referred to a healthcare provider. Persons with COVID-19-compatible symptoms should undergo COVID-19 testing.
- If community transmission is low, the district will follow the [NJDOH School Exclusion List](#) to determine when they may return to school. No public health notification is needed UNLESS there is an unusual increase in the number of persons who are ill (over normal levels), which might indicate an outbreak.

- If ill students have potential COVID-19 exposure OR if community transmission is moderate or high, they will be excluded according to the COVID-19 Exclusion Criteria.
- The Clinton Township School district does not have on site testing at this time.
- Ill individuals who test positive should be reported to the Local Health Department and contact tracing will begin.
- Ill individuals that test negative should be referred to a healthcare provider, who may consider additional COVID-19 testing.

The CTSD will follow all processes as directed by the NJDOH and NJDOE. All mandated training was completed in 2020.

- Regardless of vaccination status, if a student or staff member experiences COVID-compatible symptoms, they should isolate themselves from others, be clinically evaluated for COVID-19, and asked whether they have had potential exposure to COVID-19 in the past 14 days meeting the definition of a close contact.
- CTSD reports weekly student and staff case counts to NJDOH through the Surveillance for Influenza and COVID-19 (SIC) Module in CDRSS. Responsible staff were trained to report and have access to the system.

Quarantine and Exclusion

COVID-19 exclusion criteria for persons who have COVID-19 compatible symptoms or who test positive for COVID-19:

- Ill individuals with COVID-19 compatible symptoms who have not been tested or individuals who tested positive for COVID-19 should stay home until at least 10 days have passed since symptom onset and at least 24 hours have passed after resolution of fever without fever reducing medications and improvement in symptoms.
- Persons who test positive for COVID-19 but who are asymptomatic should stay home for 10 days from the positive test result.
- An alternate diagnosis (including a positive strep test or influenza swab) without a negative COVID-19 test is not acceptable for individuals who meet COVID-19 exclusion criteria to return to school earlier than the timeframes above.

Exception: During periods of low community transmission, ill individuals excluded for COVID-19 compatible symptoms who are not tested and do not have a known COVID-19 exposure may follow NJDOH School Exclusion List to determine when they may return to school. (updated August 2021)

The COVID-19 Exclusion List described in NJDOH guidance for Local health departments can be used to determine the need for and duration of school exclusion based on the level of COVID-19 community transmission in their region. In order to facilitate rapid diagnosis and limit unnecessary school exclusion,

schools may consider implementing school-based diagnostic testing for students and staff.

COVID-19 Exclusion Criteria for Close Contacts CDC released guidance with options to shorten the quarantine time period following exposure to a confirmed positive case. While CDC and NJDOH continue to endorse 14 days as the preferred quarantine period– and thus the preferred school exclusion period – regardless of the community transmission level, it is recognized that any quarantine shorter than 14 days balances reduced burden against a small possibility of spreading the virus.

Additional information is described in NJDOH quarantine guidance. To that end, excluded individuals who are close contacts of staff or students who tested positive for COVID-19 may be considered for a reduced exclusion period based on community transmission levels as follows:

- High (orange) exposed close contacts should be excluded from school for 14 days.
- Moderate or Low (yellow or green) exposed close contacts should be excluded from school for 10 days (or 7 days with negative test results collected at 5-7 days)

Schools serving medically complex or other high-risk individuals should use a 14-day exclusion period for the exclusion of these individuals or those who work closely with them when identified as close contacts in all levels of community transmission.

Exposed close contacts who are fully vaccinated and have no COVID-like symptoms:

- Do not need to quarantine, be excluded from school, or be tested following an exposure to someone with suspected or confirmed COVID-19.
- Should still monitor for symptoms of COVID-19 for 14 days following an exposure.
- If they experience symptoms, they should isolate themselves from others, be clinically evaluated for COVID-19, including SARS-CoV-2 testing and inform their health care provider of their vaccination status at the time of presentation to care.

J. Contact Tracing

Staff were trained as contact tracers beginning in July 2020 and continually monitor information on changes to criteria and local health department guidelines.

- a. When a student or staff member tests positive for COVID-19, the contact tracing procedure begins at the school level.
- b. Trained contact tracers from the school district obtain information about the positive individual and all of their contacts over a 48 period prior to the individual's test date or other date determined by the local health department. This includes bus transportation, lunch groups, recess contact, classroom, and any other school based activity. Contact tracing by the school district does not include outside activities or any other external activities beyond the school environment.
- c. A close contact is defined as an individual that is in contact for 15 minutes or more over a 24-hour period and within 6 feet of the infectious individual.

- i. A student wearing a well fitting mask and that is between 3-6 feet will not be quarantined as defined by the NJ Department of Health for the 21-22 school year. **See reference below:**
- ii. Exception: In the K–12 indoor classroom setting or a structured outdoor setting where mask use can be observed (i.e., holding class outdoors with educator supervision), the close contact definition excludes students who were between 3 to 6 feet of an infected student (laboratory-confirmed or a [clinical diagnosis](#)) if both the infected student and the exposed student(s) [correctly and consistently](#) wore well-fitting [masks](#) the entire time. This exception does not apply to teachers, staff, or other adults in the indoor classroom setting.
- d. NOTE: Information is confidential and is not shared with close contacts unless permission is granted.
- e. Contacts are provided with education, information, and support to understand their risk, what they should do to separate themselves from others who are not exposed, how they should monitor themselves for illness, and the possibility that they could spread the infection to others even if they themselves do not feel ill.
- f. Individuals that are vaccinated are generally not subject to quarantines when identified as a close contact, however individual circumstances may warrant COVID-19 testing or monitoring.
- g. Notification to close contacts is done by a trained contact tracer only.
- h. The school district notifies the school community of school related situations only after contact tracing is completed or when notification is warranted based on each individual situation.
- i. The CALI Score and local data is used to determine quarantine timelines and procedures.

K. Testing

- a. Community and home testing site information shared with faculty, staff, parents, and guardians.
- b. The Clinton Township School district will implement EO 253 ([Here](#)), and follow guidelines for the testing of unvaccinated employees. Additionally, we offer the following information:
 - i. This guidance from the New Jersey Department of Health, which can be accessed using the below links, also contains links to additional information and resources for schools and parents from the CDC:
 - ii. [NJDOH Public Health Recommendations for K-12 Schools 2021-2022 School year](#)
 - iii. [COVID-19 Public Health Recommendations for Local Health Departments for K-12 Schools](#)

Diagnostic Testing - This is not applicable to the Clinton Township School District at this time.

Screening Testing - This is not applicable to the Clinton Township School District at this time.

L. Student and Staff Member Travel

- a. As of May 17, 2021, there are no published travel restrictions
- b. Refer to the following web for current information:

- i. <https://covid19.nj.gov/faqs/nj-information/travel-and-transportation/are-there-travel-restrictions-to-or-from-new-jersey>
