

3. What can school districts do to help manage the rising costs associated with healthcare benefits?

- The District, like all school districts in the state of New Jersey, are trying to find other insurance carriers with less expensive plans, to re-organize the structure and types of plans offered to employees to help manage the rising cost of their healthcare benefits plan.
- Although the outside marketplace may not be an option at this time, the District is reviewing the lower cost alternatives offered through the SEHBP. By considering the lower cost alternatives, the District will help offset future renewal increases and will lower the employee's contributions.
